Theme 7 : Scripts

✓ 0

✗ 0

? 1

NA 0

🔄 12

7.4.1

Does each script initiating a change of context meet one of the following conditions?

- The user is warned by a text about the script action and the kind of change before it is activated
- The change of context is initiated by an explicit button (`input` tag of type `submit`, `button` or `image`, or `button` tag)
- The change of context is initiated by an explicit link

None of the suspected patterns for the test 7.4.1 have been detected, please check manually.

Theme 8 : Mandatory elements

✓ 3 ✗ 2 ? 1 NA 5 ⚙ 3

- ▼ **8.3.1**  For each Web page, does the default human language identification meet one of the following conditions?

✗ i

- The human language identification (`lang` and/or `xml:lang` attribute) for the page is provided via the HTML element
- The human language identification (`lang` and/or `xml:lang` attribute) for the page is provided via each text element or one of the parent elements

13 elements tested
1 element failed

The language specification is missing on the page.

- ▼ **8.5.1**  Does each Web page have a page title (`title` tag)?

✗ i

The `title` tag is missing

- ▼ **8.9.1**  On each Web page, tags must not be used (except `div`, `span` and `table`) only for layout. Has this rule been followed?

? i

23 elements tested
1 element nmi

None of the suspected patterns for the test 8.9.1 have been detected, please check manually.

Theme 9 : Structuration of information

✓ 1 ✗ 1 ? 1 NA 0 ⚙ 8

- ▼ **9.1.1**  Is there a level 1 heading (`h1` tag or a tag with an ARIA `role="heading"` associated to an `aria-level="1"` property) on each Web page?

✗ i

The `h1` tag is missing.

- ▼ **9.1.4**  On each Web page, is each heading (`h1` to `h6` tag or a tag with an ARIA `role="heading"` associated to an `aria-level` property) relevant?

? i

7 elements tested
7 elements nmi

Check the pertinence of the following headings (`h` tags) :

Textual content of the tag	Tag	Snippet	Line
Language of content	h2	<code><h2>Language of content</h2></code>	Line 12
html element is missing a lang attribute	h3	<code><h3>html element is missing a lang attribute</h3></code>	Line 13
Page Title	h2	<code><h2>Page Title</h2></code>	Line 17
Missing page title	h3	<code><h3>Missing page title</h3></code>	Line 18
Headings	h2	<code><h2>Headings</h2></code>	Line 22
Missing H1	h3	<code><h3>Missing H1</h3></code>	Line 23
Implicit heading	h3	<code><h3>Implicit heading</h3></code>	Line 27

Theme 13 : Consultation

✓ 0 ✗ 0 ? 1 NA 7 ⚙ 13

- ▼ **13.2.1**  On each Web page, for each new window opening launched via a link (`target="_blank"` attribute) or a JavaScript command, is the user warned?

? i

Check user is warned if a javascript command prompts a new window :
